

Module 3: Assignment

Threat classification frameworks

MCY 630 Security Architecture

Assignment Submission Instructions

Submission requirements: assignment

File format: MSWord or pdf (preferred)

Report requirements

- Include your name and assignment title at the top of the document.
- Number the questions and answers and answer each question in your submission in sequence.
- For each response, include the required text as well as any necessary images and diagrams.
- Use black font color for texts
- If uploading an MSWord format file, view the uploaded file from Canvas to make sure that the layout of images and texts are not overlapping in the report. If the contents seem to have moved around, upload a pdf instead of an MSWord file.

Questions

1. Consider the following threat and attack classification frameworks:

- STRIDE
- PASTA
- LINDDUN
- CVSS
- Attack Trees
- DREAD

Create a report with the compare and contrast analysis of the frameworks in respect to the following aspects:

- Suitable domain/scenario of application
- Scope within project lifecycle
- Inputs required
- Processes/Activities involved
- Framework output
- Advantages (over others)
- Limitations (over others)
- Feel free to add further points.

Notes/Guideline:

- (6 frameworks * 8 points) + 2 (formatting and layout) = 50 points
- Present your analysis in a tabular format as shown in the next page.
- You may change your MSWord document layout orientation to “landscape” if necessary (Layout -> Orientation ->)
- It is recommended to spend some time doing online research before you start answering.
- Be careful to not copy text from online sources verbatim.
- Provide references where applicable.

Sample table format for assignment

	STRIDE	PASTA	LINDDUN	CVSS	Attack Tree	DREAD
Suitable domain or scenario of application						
Scope within project lifecycle						
Inputs required						
Processes and activities involved						
Framework output						
Advantages (over others)						
Limitations (over others)						
(Optional) Any other points to consider
